Astemir Boziev

Python Developer

ADDRESS   Nalchik, Russian Federation

EMAIL   astemirboziy@gmail.com

PHONE   +79034971389

LINKS   GitHub, Facebook, Linkedin

Skills

Python	Basic Docker
Django	Basic HTML
Git	Basic CSS
Flask	Java (basic)

Employment History

Jan 2019 — Dec 2019
NALCHIK

Automation Engineer
AxxonSoft axxonsoft.com

I was responsible for the development and maintenance of the automated tests for the HTTP API and web server of the company's software. Refactored code base using DRY principle. I was also developing a service for parsing dump files using flask, PostgreSQL (sqlalchemy), Redis and windbg.

Achievements: before I got my tests 80% of them were unstable when I left the job 95% of them became stable. The service I was developing automated the process of dump parsing, so developers from other departments shouldn't spend any time to parse dump files.

May 2014 — Present
NALCHIK

Python developer
Teacher association of Circassian language (volunteer job)

I was part of a team that organized various kinds of events aimed at promoting and developing the native language among Circassian youth. Since 2018 I have been developing a Circassian online library. The first version of the site is ready, and now we are working on digitizing books.
